NaviPlan User Guide Series

NaviPlan user guides are organized by the tasks you can accomplish in each level. If you are a new NaviPlan user, start with the **Introduction** user guide.

User manual	Tasks covered
Introduction	■ Setting up user preferences. ■ Creating and managing client engagements. ■ Determining which assessment or plan level to select. ■ Using NaviPlan workflow.
Calculators	■ Using calculators to model specific aspects of your clients' finances.
Forecaster Assessment	■ Quickly assessing your clients' current financial situation. ■ Entering account and annuity information.
Asset Allocation Assessment	■ Determining your clients' investor profile.
Level 1 and Level 2 Plans: Entering client data and goals	■ Entering financial planning assumptions. ■ Entering detailed net worth, cash flow, and insurance information. ■ Adding holdings to accounts and annuities. ■ Entering saving and redemption strategies. ■ Entering client goals. ■ Generating client reports.
Level 1 and Level 2 Plans: Analyzing client goals	■ Analyzing your clients' goals using Scenario Manager. ■ Conducting detailed cash flow and net worth analyses. ■ Generating Monte Carlo simulations. ■ Creating goal scenarios. ■ Generating client reports.

Conventions

This user guide uses the following conventions.

- The names of items on the screen are bolded and italicized. For example, the ***Clients*** page opens.
- The names of items that you must select, click, or enter appear in bold. For example, select **Recommended**, and then click **OK**.
- To help you navigate through the application, locations are separated by en dashes (–). For example, Enter Financial Data section – **Net Worth** category – **Accounts** page.

Enter Financial Data section – Net Worth category – Accounts page

To help you use this guide, please note the following abbreviations and graphics:

- AA – Refers to the Asset Allocation Assessment.
- FA – Refers to the Forecaster Assessment.
- **Level 1** – Indicates that the step or paragraph applies to Level 1 Plans only.
- **Level 2** – Indicates that the step or paragraph applies to Level 2 Plans only.
- **A, Tax** – Indicates that the step or paragraph only applies when you are using the Average Tax method.
- **D, Tax** – Indicates that the step or paragraph only applies when you are using the Detailed Tax method.

NaviPlan Resources

Advicent provides several resources to help you use NaviPlan. The following table shows some of the resources available and where to find them.

Advicent resource	Description and location
Help	The quickest way to get information about any item within NaviPlan is to use the application Help. To access Help, select NaviPlan Help from the Help & Resources menu. Help includes a glossary of terms.
Functional documents	Functional documents explain NaviPlan functionality, underlying assumptions, and results calculations. You can access functional documents from the NaviPlan Learning Centre .
Quick Reference Guides (QRGs)	Quick Reference Guides are designed to get you started with a particular workflow in NaviPlan. You can access QRGs from the NaviPlan Learning Centre .
User Guides	You can also access other user guides in this series . You can access guides from the NaviPlan Learning Centre .
Help Videos	Help videos are designed to give you an overview of each section in NaviPlan. You can access help videos from the NaviPlan Learning Centre .

Chapter 2: Analyzing goals in NaviPlan

This chapter introduces **Scenario Manager**, which is accessible from the **Results** section – **Analyze Goals** category in NaviPlan.

In most plans, the clients' current resources and strategies do not meet their goals. With NaviPlan you can create What-if scenarios that contain additional assumptions and strategies to help develop an optimal solution for the clients. Even in plans where the goal is adequately funded or overfunded, What-if scenarios can be used to find an optimal solution.

Scenario Manager allows you to create and compare multiple scenarios side-by-side without having to create duplicate plans. Once you have an appropriate scenario that you can apply to your clients' plan, you can mark it as the Recommended Plan. Recommended scenarios are included in client reports.

By default, the **Scenarios** page displays the Current Plan scenario, which cannot be edited in the **Scenario Manager** dialog box, as well as the Recommended Plan scenario (current plan with suggested asset allocation). The Current Plan scenario represents the plan that is open, whereas the Recommended Plan scenario is generated by NaviPlan and uses the suggested asset mix. You can create as many alternative scenarios as you like, but only one can be marked as the Recommended Plan scenario.

In this chapter:

Comparing scenarios	11
Understanding scenario differences in Level 1 and Level 2 Plans	13
Adding Alternative Plan scenarios	14
Achieving goal success and viewing goal coverage	15
Achieving goal success in a scenario	15
Viewing goal coverage for other goals	17
Comparing and recommending scenarios	18
Comparing scenarios for an individual goal	18
Recommending a scenario	18
Determining scenario probability (Level 2 Plans)	19
Creating goal funding strategies (Level 2 Plans)	23
Managing scenarios in client reports	24
Adding notes to scenarios	24
Generating scenario reports	24

Comparing scenarios

On the **Scenarios** page you can compare the Current Plan scenario (the clients' current financial situation) with the Recommended Plan scenario (the proposed option, or best case scenario). As well, you can create numerous alternative scenarios. Two alternative scenarios can be shown on the **Scenarios** page for comparison purposes. The **Scenarios** page allows you to see at a glance how the changes you make to the plan may affect goal coverage, as well as overall net worth and cash flow.

Results section – Analyze Goals category – Scenarios page

NaviPlan automatically creates a Recommended Plan scenario based on the current plan with suggested asset allocation. The column on the far left of the **Scenarios** page is split into two categories, **Modify Financial Data** and **Analyze Goals**, similar to the left navigation bar in NaviPlan. To view the plan details, click **Edit Recommended Plan** or any of the links.

Results section – Analyze Goals category – Scenarios page – Edit Recommended Plan button – Scenario Manager dialog box – Summary details

The left side of **Scenario Manager** has the same two categories: **Modify Financial Data** and **Analyze Goals**. Clicking any of the links under these headings changes the information displayed on the right. For example, to see retirement goal details, under **Analyze Goals**, click the **Retirement** link.

Scenario Manager has tabs for each plan shown on the **Scenarios** page. You can quickly compare the current, recommended, and alternative plan details by clicking the other tabs. Only the recommended and alternative plan details are editable.

On the **Recommended Plan** and **Alternative Plan** tabs, you can implement various planning strategies into the plan to solve goal shortfalls, manage cash flow, etc.

Understanding scenario differences in Level 1 and Level 2 Plans

In a Level 1 Plan you can analyze fairly simple What-if scenarios using the **Scenarios** page and **Scenario Manager**. In a Level 2 Plan, more complex What-if scenarios can be analyzed. For example, the **Scenario Manager – Retirement** section for a Level 2 Plan has additional tabs—**Transfers**, **Redemptions**, **Liquidation Order**, **Bucketing**, **Annuitization**, **Incomes**, and **Expenses**—that allow you to modify the What-if scenarios.

Retirement

Goal Coverage

83%

WHAT ARE MY OPTIONS?

Robert's Retirement Age: 59 = (92 +/- 0)

Sarah's Retirement Age: 65 = (65 +/- 0)

Fixed Annual Retirement Expenses: 100%

Discretionary Annual Retirement Expenses: 100%

Non-Reg. Add'l Monthly Savings: \$0

Current Monthly Savings: \$0 (as of Aug 1 2013)

Additional Lump Sum Savings: \$0

Additional tabs are available in Level 2 Plans.

Scenario Reports

Objectives | **Savings** | **Transfers** | **Liquidation Order** | **Redemptions** | **Bucketing** | **CPP/QPP & OAS** | **Incomes** | **Expenses**

Investment Objective

Investment Objective	Investment Profile
Pre-retirement	☐ Conservative
Retirement	☐ Conservative

Return Rates

☐ Override

	Pre-retirement	Retirement
Interest	3.50%	3.50%
Dividends	0.75%	0.75%
Capital Gains	2.50%	2.50%
Deferred Growth	3.00%	3.00%
Total	9.75%	9.75%
Standard Deviation	39.00%	39.00%

Results section – Analyze Goals category – Scenarios page – Retirement link clicked – Scenario Manager dialog box – Recommended Plan - <scenario name> – Objectives tab

In a Level 2 retirement scenario, you can consider scenario probability you also have the ability to sell an asset.

Adding Alternative Plan scenarios

Clicking the **Create Alternative** button on the **Scenarios** page allows you to create alternative scenarios in addition to the **Recommended Plan (Alternative 1)** scenario. NaviPlan has some predefined scenarios that can be added to education, retirement, and major purchase goals. However, you can also create unique scenarios that closely reflect your clients' financial situation and preferences.

To add an **Alternative Plan** scenario, follow these steps:

1. Go to the **Results** section – **Analyze Goals** category – **Scenarios** page.
2. Click **Create Alternative**.

The 'Create Alternative' dialog box is titled 'Create Alternative' and includes a red 'Required' indicator, a help icon, and a close icon. It contains three steps:

- Step 1:** Enter a description that identifies the *Alternative* scenario you are creating. The 'Alternative Name' field is required and contains the text 'Alternative 6'.
- Step 2:** Select the scenario from which you would like to copy. The 'Copy Existing Scenario' field is required and has a dropdown menu showing 'Current with Suggested Asset Alloc.'.
- Step 3:** Select which predefined scenario(s) you would like to apply. The 'Retirement' field has a dropdown menu showing 'Maintain Current Plan Settings'.

At the bottom right, there are 'OK' and 'CANCEL' buttons.

Create Alternative dialog box

3. Enter a name for the scenario.
4. Select the scenario you would like to use as the basis for the new scenario.
5. If you selected **Current with Suggested Asset Allocation** as the scenario you want to copy, select which predefined scenarios you would like to apply to each of the goals in your scenario.

Note: To delete an alternative scenario, click the **Delete** button at the top of the listed scenario on the **Scenarios** page. The **Current Plan** and **Recommended Plan** scenarios cannot be deleted.

Achieving goal success and viewing goal coverage

NaviPlan recommends options to achieve each goal. To view the recommended options, click **What Are My Options?**. The options may differ among goals.

Achieving goal success in a scenario

To achieve 100% goal coverage in a scenario, follow these steps:

1. Go to the **Results** section – **Analyze Goals** category – **Scenarios** page – **Edit <scenario> Plan – Scenario Manager** dialog box – **<goal>** link.

Retirement

2. Use the sliders to easily adjust values to solve goals.
3. To achieve 100% success, under **Goal Coverage**, click **What Are My Options?**.

What Are My Options?

The following options will achieve a 100% goal success. Select an option to implement as part of the scenario. Select **Continue Planning...** if you do not want to implement any of the scenarios.

☐ Cover % of Expenses 100% (\$0)
OR
☐ Save Monthly \$182
OR
☐ Save a Lump Sum \$20,866
OR
☐ Retire in Jan 2034/Jan 2034 (63/61)
OR
☒ Continue Planning...

OK **CANCEL**

What Are My Options? dialog box (showing retirement options)

4. Select one option that would achieve 100% goal coverage.
5. If you don't want to use any of the 100% options, select **Continue Planning**. To use a combination of options, such as saving a smaller monthly amount and retiring a few years later, define the options yourself by using the slider bars or entering plan modifications in **Scenario Manager**.

Viewing goal coverage for other goals

Under **Analyze Goals**, you can view the status of all other goals in the scenario.

Scenario Manager dialog box – Analyze Goals details

Changes made to one goal can affect other goals. The colour-coded boxes under **Analyze Goals** indicate the expected goal coverage success for the goal.

The colour...	Indicates that...
Green	Goal coverage is 90% or greater.
Yellow	Goal coverage is between 65% and 89%.
Red	Goal coverage is less than or equal to 64%.

To view another goal in this scenario, under **Analyze Goals**, click the link for the goal you want to view. The selected goal's details appear on the right side of **Scenario Manager**.

Note: You can calculate insurance goal coverage by clicking the **Calculate** links or **Calculate All**.

Comparing and recommending scenarios

NaviPlan allows you to compare multiple scenarios for meeting goals, without having to create duplicate plans. Once you have an appropriate scenario for your clients' plan, you can recommend it.

The Recommended Plan scenario is a system-generated plan that incorporates the current plan and the recommended scenario. NaviPlan incorporates the strategies into the Recommended Plan scenario in reports and graphs.

Comparing scenarios for an individual goal

To compare scenario details for a goal, follow these steps:

1. Go to the **Results** section – **Analyze Goals** category – **Scenarios** page, and then click **Edit <scenario> Plan**.
2. Under **Analyze Goals**, select the goal you want to compare.
3. Click **Compare Scenarios**.
OR
If you've selected the **Monte Carlo** module, click **Scenario Reports**, and then select **Compare Scenarios**.
4. Select the scenarios you want to compare. NaviPlan displays an analysis of the two scenarios, including assumptions and a graph for each scenario.
5. To view additional assumptions, go to the **Assumptions Comparison** tab.

Note: The **Assumptions Comparison** tab does not appear for the emergency fund goal.

Recommending a scenario

NaviPlan allows you to recommend the scenario you want to apply to your clients' plan. Recommended scenarios apply to reports where the **Recommended** plan type is used.

To recommend a scenario for a goal, go to the **Scenarios** page, and then click **Recommend Plan**.

Results section – Analyze Goals category – Scenarios page (showing top of the Scenarios section only)

A goal can only have one recommended scenario. You cannot recommend the **Current Plan** scenario.

Determining scenario probability (Level 2 Plans)

Note: The *Monte Carlo* module must be included to perform scenario probability analyses.

The traditional planning process analyzes one possible outcome of the clients' plan, which assumes that the accounts will always earn their stated return rates. While return rates usually average out in the long run, in the short run they may be higher or lower than average.

Probability analysis projects the scenario multiple times and randomizes account return rates according to their standard deviation for each trial. The goal success of each trial may change due to asset performance. The goal success of each trial is plotted on probability graphs.

To determine the likelihood that your clients will meet a particular goal, follow these steps:

1. Go to the **Results** section – **Analyze Goals** category – **Scenarios** page, and then click the **Edit <scenario> Plan**.
2. Under **Analyze Goals**, select the applicable goal link.
3. Under **<goal>**, click **Scenario Reports**, and then select **Scenario Probability**.

The image shows a dialog box titled "Scenario Probability Details". It has a close button (X) and a help button (?) in the top right corner. The main text inside the dialog box says: "Enter the number of trials to be used when testing the scenario's probability of success in the *Total Probability Trials* field." Below this text is a label "Total Probability Trials" followed by a text input field containing the number "150". At the bottom right of the dialog box are two buttons: "OK" and "CANCEL".

Scenario Probability Details

Enter the number of trials to be used when testing the scenario's probability of success in the *Total Probability Trials* field.

Total Probability Trials 150

OK CANCEL

Scenario Probability Details dialog box

4. Enter the number of probability trials you want NaviPlan to perform, and then click **OK**. After NaviPlan calculates the scenario probabilities, the **Scenario Probability** dialog box – **Probability** tab opens showing a goal coverage graph for the scenario. The **Portfolio Variability Projection** and **Investment Capital** tabs also appear. To view more details about a graph, click the **Graph Information** link.

Scenario Probability dialog box – Probability tab

- To view return rate details for the probability analysis, go to the **Portfolio Variability Projection** tab. By default, the **Portfolio Variability Projection** graph shows the scenario's compounded rate of return.

Scenario Probability dialog box – Portfolio Variability Projection tab

6. To view the annual rate of return instead, select **Annual ROR**.
7. To view the projected capital accumulation, go to the **Investment Capital** tab.
8. If you are viewing results for a retirement goal and you want to determine the probability that all needs will be covered, go to the **Probability** tab, and then select **% Total Needs Covered by Total Resources**.
OR
To determine the probability that all fixed retirement needs will be covered, select **% Fixed Needs Covered by Total Resources**.

Scenario Probability dialog box – Investment Capital tab

- Enter the number of trials you want NaviPlan to perform, and then click **Calculate**. The graph updates.

Note: A higher number of trials will provide a more accurate probability distribution. However, NaviPlan will require more time to calculate the results of the probability analysis.

Creating goal funding strategies (Level 2 Plans)

In addition to entering goal funding assumptions, NaviPlan allows you to analyze various goal funding strategies, and then apply an appropriate strategy to the clients' recommended plan.

To create a goal funding strategy, follow these steps:

1. Go to the **Results** section – **Analyze Goals** category – **Scenarios** page, and then click **Edit Recommended (or Alternative) Plan**.
2. Under **Analyze Goals**, click **Goal Funding**.

Goal Funding

☐ Override Current Plan settings

Existing Accounts

Account Name (Owner/Account Type)	Total	Retirement	University Education	Vehicle	Emergency Fund	Unallocated
Savings (Joint/Non-Reg.)	\$15,000	\$0	\$0	\$0	\$0	\$15,000
Robert's RRSP	\$75,000	100%	\$0	\$0	\$0	\$0
Sarah's RRSP	\$75,000	100%	\$0	\$0	\$0	\$0
	\$165,000	\$150,000	\$0	\$0	\$0	\$15,000

Scenario Manager dialog box – Goal Funding link – Goal Funding details

3. Select the **Override Current Plan settings** option.
4. Under **Goal Funding** in the available fields, enter a fixed dollar value, a percentage, or the keyword **balance** for each non-registered account, as explained in the following table:

Enter...

To fund goals in this manner...

Dollar
value

The account funds for this goal are used before those assigned a percentage or a balance. If fixed amounts are assigned to multiple goals, and the combined fixed amounts exceed the value of the account, then funds are automatically distributed according to the dollar amount entered.

Percentage

The account funds for this goal are used before those assigned a balance. Only goals with fixed amounts take precedence.

The word:
balance

All remaining unallocated funds in the account are directed to the goal. The account funds for this goal will be used after those assigned a percentage or a fixed amount. If **balance** is entered for more than one goal, then the remaining balance is distributed equally among those goals.

For more information about funding goals, see *Allocating accounts to goals in Level 1 and Level 2 Plans – Entering client data and goals*.

Note: Registered accounts can only be allocated to the retirement goal.

Managing scenarios in client reports

NaviPlan allows you to manage multiple plan scenarios without having to concentrate on individual scenario details. You can determine which scenarios should be included in client reports.

To include alternative scenarios in reports, follow these steps:

1. Go to the **Results** section – **Analyze Goals** category – **Scenarios** page.
2. Click **Include Alternatives In Reports**.

The dialog box titled "Include Alternatives In Reports" contains the following elements:

- A header bar with a question mark icon and a close button (X).
- Instructional text: "Select the alternative scenarios to be included in the reports from the lists below."
- A table with two columns: "Scenario" and "Scenario Name".

Scenario	Scenario Name
Current	Current Plan
Recommended (Proposed)	Alternative 1
Alternative A	
Alternative B	
- At the bottom, there are two buttons: "OK" and "CANCEL".

Results section – Analyze Goals category – Scenarios page – Include Alternatives In Reports button – Include Alternatives In Reports dialog box

3. Select an alternative scenario from the menus for **Alternative A** and **Alternative B**.

Adding notes to scenarios

You can add your own notes to almost every page in NaviPlan, including the **Scenarios** page and **Scenario Manager** dialog box. Once you have added a note to a scenario, an asterisk appears on the **Notes** button indicating that there is a note in the scenario.

To add a note to a scenario, follow these steps:

1. In the **Scenario Manager** dialog box, click **Notes**.
2. In the **Notes** dialog box, enter the note.

Generating scenario reports

After you have defined a scenario in NaviPlan, you can examine the effect the scenario will have on the plan.

To generate a scenario report, follow these steps:

1. Go to **Quick Actions - Reports** menu, and then select the report you want to view.
2. Select the applicable scenario.

Chapter 3: Creating goal scenarios

This chapter describes how to customize scenarios for retirement, education, major purchase, and emergency fund goals, and assumes you already know how to use the common features of *Scenario Manager*.

For more information about analyzing goals using scenarios, see **Chapter 2: Analyzing goals in NaviPlan** on page 10.

In this chapter:

Customizing what-if scenarios: Retirement	26
Entering retirement scenario objectives	26
Entering additional retirement savings (Level 2)	27

Customizing what-if scenarios: Retirement

NaviPlan allows you to customize existing retirement scenarios to help meet the needs of your clients' financial situation and their preferences. Once you have an appropriate scenario for your clients' plan, you can recommend it. Recommended scenarios apply to reports where the **Recommended** plan type is used. For information on recommending scenarios, **Recommending a scenario** on page 18.

All what-if scenarios are created and customized in **Scenario Manager**. To access it, go to the **Results** section – **Analyze Goals**, and then click **Edit <scenario> Plan**.

Entering retirement scenario objectives

To enter scenario objectives for the retirement goal, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the **Retirement** link.

☐ Override

	Pre-retirement	Retirement
Interest	0.00%	0.00%
Dividends	0.00%	0.00%
Capital Gains	0.00%	0.00%
Deferred Growth	0.00%	0.00%
Total	0.00%	0.00%
Standard Deviation	0.00%	0.00%

Scenario Manager dialog box – Retirement link – Objectives tab

2. To change the retirement age of the client or co-client, enter a positive or negative number in the **(Age +/-)** field, or move the slider bars. The retirement age will be adjusted by that number. For example, to change the retirement age from 65 to 55, enter -10 in the **(Age +/-)** field.

Note: To override other assumptions, such as life expectancy and the inflation rate for this scenario, under **Modify Financial Data** click **Assumptions**, select the applicable **Override** option, and then edit the data.

3. To override the default investment profile for the pre-retirement or retirement period, go to the **Objectives** tab, select the **Investment Objective** option next to the profile, and then select a different profile. The **Return Rates** fields update automatically.
 - The default investment profile for the plan is defined on the **Plan Management – Asset Allocation – Profile** page.
4. To override the return rates for the scenario, select the applicable **Override** option, and then enter new return rates.
5. If applicable, enter the percentage of fixed and discretionary expenses to cover during retirement.

Entering additional retirement savings (Level 2)

To enter additional savings for the retirement goal within the scenario, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the **Retirement** link.

Non-Reg. Add'l Monthly Savings

A horizontal slider bar with a circular handle on the left. To its right is a rectangular input field containing the text "\$0". A small pencil icon is located to the right of the input field.

Additional Lump Sum Savings

A horizontal slider bar with a circular handle on the left. To its right is a rectangular input field containing the text "\$0". A small pencil icon is located to the right of the input field.

Scenario Manager dialog box – Retirement link – Retirement details (showing Savings slider bars and fields)

2. Use the slider bars for **Non-Reg. Add'l Monthly Savings** and **Additional Lump Sum Savings** to arrive at an optimal savings amount, or enter the amount. NaviPlan assumes that the savings are directed to a non-registered account, which is created when the savings are entered. The return rate is based on the suggested asset mix.
3. To specify additional savings strategy details such as inflation rates, and start and end dates, click .

Editing existing or adding new savings strategies (Level 2)

To edit existing savings strategies or to add new savings strategies for the retirement goal into the scenario, follow these steps:

1. In **Scenario Manager** under **Modify Financial Data**, click the **Retirement** link, then go to the **Savings** tab.

Retirement Savings

Consider using a maximizer savings strategy to reduce any excess RRSP contributions and eliminate any unused deduction room. Refer to the **Planning Assistant** for additional details concerning the registered accounts. Refer to [Help](#) for information concerning the maximizer strategy.

Start Date: Inflation +/- Add'l: Indexed By ☐ +

	Eric	Veronica
Account Type	Reg. Add'l Monthly Savings	Reg. Add'l Monthly Savings
RRSP (\$ or MAX)	\$0	\$0
RRSP - Spousal (\$ or MAX)	\$0	\$0
TFSA	\$0	\$0

Scenario Manager dialog box – Strategies link – Savings tab

2. To increase registered savings to any RRSPs, RRSP Spousal, and/or TFSAs, use the sliders to adjust the extra savings for the appropriate account types.
3. To index the savings to inflation or another percentage, select the **Indexed By** option, and then enter an index rate.
4. Under **Analyze Goals**, click the **Retirement** link to return to **Retirement** details. Under **Goal Coverage**, note that the goal coverage for the retirement goal updates.

Entering retirement transfer strategies (Level 2)

Note: Transfers cannot be entered in the Current Plan scenario.

To model transferring assets from one account to another, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the **Retirement** link, and then go to the **Transfers** tab.

Transfers

Choose Source Account ...

Source Account	Destination Account	Account Details	Transfer Amount (\$ or %)	Transfer Date	Dest. Acct. Owner's Age	Actions
New account			\$0	Nov 1 2014	NA	✕

Scenario Manager dialog box – Retirement link – Transfers tab

Note: Only accounts created in the current plan that are funding the retirement goal in whole or in part are available.

2. Under **Choose Source Account**, select the source account you want to transfer funds from, and then click **Add Transfer Strategy**.
3. From the **Destination Account** menu, select the account you want to transfer funds to, and then enter the dollar amount or percentage of the source account you want to transfer.
4. Enter the date when you want the transfer to occur.

Entering liquidation strategies (Level 2)

To define the liquidation order of assets to cover cash flow deficits, and to define additional automatic redemptions in the retirement goal scenario, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the **Retirement** link, and then go to the **Liquidation Order** tab.

The screenshot shows the 'Liquidation Order' tab in the Scenario Manager dialog box. The tab is selected, and the following options are visible:

- ☒ **Override the default order**
- Choose the order in which assets are redeemed during retirement:
- A dropdown menu showing 'Non-Registered - TFSA - Registered' with a downward arrow.
- A blue button labeled 'VIEW/MODIFY LIQUIDATION ORDER...'.

Scenario Manager dialog box – Retirement link – Liquidation Order tab

2. To override the liquidation order settings for the plan, select the **Override the default order** option.
3. To redeem assets by account type only, select one of the existing liquidation options.
OR
To edit the order of specific accounts, select the **Modify the liquidation order** option. A menu of existing accounts and the current liquidation order appears. By default, the accounts are ordered based on the selected liquidation option.
Note: For non-registered accounts, NaviPlan only redeems the portion that is linked to the retirement goal.
4. To change the liquidation order of individual accounts, for each applicable account, select the account, and then click **Move Up** or **Move Down**. The liquidations occur when cash flow deficits exist in the plan during the retirement period.

Entering redemptions (Level 2)

To enter automatic retirement redemptions that will occur outside deficit coverage, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the **Retirement** link, and then go to the **Redemptions** tab.

Objectives	Savings	Transfers	Liquidation Order	Redemptions	Bucketing	Annuitization	CPP/QPP & OAS	Incomes	Expenses
------------	---------	-----------	-------------------	-------------	-----------	---------------	---------------	---------	----------

Redemptions

New account	☐	0.00%	Monthly ▼	Ret. (1st) 📅	Death (2nd) 📅	✎ ✕

Scenario Manager dialog box – Retirement link – Redemptions tab

2. Select an account from which funds will be redeemed, and then click **Add Redemption Strategy**.
3. If you expect the entire account to be redeemed, select the **Redeem All** option, and then enter (or select) the date when the redemption should occur. Redemptions can only occur on or after the retirement date.
4. Enter the dollar amount of each redemption.
5. From the **Frequency** menu, select the frequency of the redemption.
6. Enter **Retirement** or a start date during retirement, and then enter the strategy end date.
Note: If **Lump Sum** is selected from the **Frequency** menu, you cannot enter an end date or index the amount.
7. To exclude penalties for early withdrawals or to index the redemptions to inflation, click ✎, and then edit the details as required.

Modeling bucketing strategies

1. To model a bucketing strategy, go to the **Bucketing** tab and then complete the following steps:
 - a. Click **Estimate**.
 - b. Enter the number of years over which the "bucket" investment account will cover needs, and click **OK**.
 - c. The amount determined by the calculator will appear in the **Target Balance** field.
 - d. Enter the remaining details of the bucketing strategy.

Objectives	Savings	Transfers	Liquidation Order	Redemptions	Bucketing	Annuitization	CPP/QPP & OAS	Incomes	Expenses

Results section - Analyze goals category - Scenarios page - Edit <scenario> Plan button - Scenario Manager dialog box - Retirement link - Bucketing tab

Entering annuitization strategies (Level 2)

An annuitize-to-need scenario calculates the amount of redeemable non-annuity assets required to purchase annuities that provide income for needs starting at retirement. An annuitization strategy can demonstrate the benefits of covering some expenses with a guaranteed annuity income stream, instead of relying on market performance to provide enough growth to cover basic retirement needs. This strategy can be of particular interest to clients who are near retirement or are already retired. To enter annuitize-to-need scenarios, follow these steps:

1. In **Scenario Manager**, under **Analyze Goals**, click the **Retirement** link, and then go to the **Annuitization** tab.

The screenshot shows the 'Annuitization' tab within the 'Scenario Manager' dialog box. At the top, there is a horizontal menu with tabs: Objectives, Savings, Transfers, Liquidation Order, Redemptions, Bucketing, Annuitization (selected), CPP/QPP & OAS, Incomes, and Expenses. Below the menu, the 'Annuitization' section is active. It contains a checkbox labeled 'Override current annuitization settings'. Below this, a text prompt reads: 'Review how applying an annuitize-to-need strategy can affect the scenario.' This is followed by a numbered list: 1. Estimate the additional income gap to cover, 2. Select the assets to annuitize, and 3. Review the results and assumptions. Under step 1, there is a text input field showing '\$0 /yr (in future dollars)' and a button labeled 'Estimate Income Gap...'.

Scenario Manager dialog box – Retirement link – Annuitization tab

2. Select the **Override current annuitization settings** option.
3. To estimate the gap between expenses and fixed incomes during retirement, click **Estimate Income Gap**.
 - a. Specify whether the income gap should be expressed in future dollars or in today's dollars.
 - b. Use the graph to determine the size of the income gap that should be covered by annuity income, and then enter that amount in the **Estimate the additional income gap to cover** field.
 - c. In the **AIR** field, enter the expected rate of return for the new annuity.
 - d. Click **Calculate**. NaviPlan calculates and displays in the **Payment per \$1,000** field the amount that will be paid out of the annuity for every \$1,000 of market value that is transferred into the annuity.
 - e. If you do not want to use the calculated **Payment per \$1,000** value, select the **Override** option, and then in the **Payment per \$1,000** field, enter the value you would rather use.
 - f. Click **OK**.

Assets for Annuitization

Select the asset types to be made available to provide additional fixed annuity income.

	Maximum Percentage
☒ Non-Registered	100%
☐ Registered	100%
☐ TFSA	100%

Order of Annuitization

Choose to either maintain the existing liquidation order for the scenario or apply a different order in which available assets will be used to provide annuity income.

☒ Use scenario liquidation order settings ¹

☐ Use assets in the following order for annuitization

¹ Using only assets that have been made available under *Assets for Annuitization*.

OK CANCEL

Scenario Manager dialog box – Retirement link – Annuitization tab – Select the assets to annuitize link – Assets for Annuitization dialog box

4. To convert asset types into an annuity, click the **Select the assets to annuitize** link.
 - a. Select the asset types you want NaviPlan to convert into an annuity, and then enter the maximum percentages you want NaviPlan to convert. For example, if you do not want to sell more than half of the clients' non-qualified assets to fund annuities, enter 50% for that asset type. By default, non-registered assets are available for the annuity.
 - b. If you selected more than one asset type, under **Order of Annuitization**, select the order in which you want NaviPlan to sell the selected asset types. You can select **Use assets in the following order for annuitization**, and then select an annuitization order from the menu, or you can select **Use scenario liquidation order settings for annuitization order** and have NaviPlan use the liquidation order set on the **Retirement: Liquidation Strategies** tab of the **Scenario Manager** dialog box.
 - c. Click **OK**.
5. Click the **Review the results and assumptions** link. The **Annuitize to Need Results and Assumptions** report opens and displays the results of the strategy and the assumptions used in it.

Note: If you made additional assets available for the annuity, the clients may be able to cover a larger income gap. To re-estimate the income gap, repeat the procedure.

Defining CPP/QPP and OAS Benefits

Note: If both the client and co-client are retired in a joint plan, the **CPP/QPP & OAS** tab is unavailable. If only one client in a joint plan is retired, the scenario options are only available for the client in pre-retirement.

To analyze the effects of receiving benefits starting at various ages, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the **Retirement** link, and then go to the **CPP/QPP & OAS** tab.

Scenario Manager dialog box – Retirement link – CPP/QPP & OAS tab

3. Select the **Override** option.
4. For each client, modify the assumptions as needed.

Adding incomes and expenses (Level 2)

To add annual incomes and expenses to the retirement scenario, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the **Retirement** link, and then go to the **Incomes** tab.
2. Clicking the **Incomes** link takes you to the **Incomes** tab in the **Cash Flow** details section of **Scenario Manager**, where you can add incomes.
3. Go to the **Expenses** tab.
4. Clicking the **Existing Expenses** link takes you to the **Existing Expenses** tab in the **Cash Flow** details section of **Scenario Manager**, where you can edit existing expenses.
5. Clicking the **New Expenses** link takes you to the **New Expenses** tab in the **Cash Flow** details section, where you can add new pre-retirement and retirement expenses.

Adding new retirement accounts and annuities to the scenario (Level 2)

To add new accounts and annuities to the scenario, follow these steps:

1. In **Scenario Manager** under **Modify Financial Data**, click the **Net Worth** link, and then go to the **Accounts** or the **Annuities** tab.
2. Click **Add Account**, **Add Guaranteed Withdrawal Benefit**, **Add Existing Annuity**, or **Add Future Annuity**.

Modeling a change in the province of residence during retirement

To model a change in the province of residence for your clients during the retirement period, follow these steps:

The screenshot shows the 'Tax Details' tab in the 'Scenario Manager' dialog box. Under the 'Future Province of Residence' section, there is an 'Override' checkbox, a dropdown menu currently set to 'Alberta', and an 'Effective Date' field set to 'Ret. (1st)'. To the right, under the 'Average Tax Rate' section, there are three input fields: 'Client' with '20.00%', 'Co-Client' with '20.00%', and 'Dependants' with '0.00%'.

Scenario Manager dialog box – Assumptions link – Tax Details tab

1. In **Scenario Manager** under **Modify Financial Data**, click the **Assumptions** link.
2. Click the **Tax Details** tab.
3. Select the **Override** option, and select the state to which you clients intend to move from the **Future Province of Residence** menu.
4. Additionally, if the province to which your clients intend to move has a different rate of taxation you can enter the new rate into the **Average Tax Rate** field.

Customizing what-if scenarios: Education & Major Purchase

NaviPlan allows you to customize existing education or major purchase goals within scenarios to help meet the needs of your clients' financial situation and their preferences. Once you have an appropriate scenario for your clients' plan, you can recommend it. Recommended scenarios apply to reports where the **Recommended** plan type is used. For information on recommending scenarios, **Comparing and recommending scenarios** on page 18

All what-if scenarios are created and customized in **Scenario Manager**. To access it, go to the **Results** section – **Analyze Goals** category – **Scenarios** page, and then click **Edit <scenario> Plan**.

Entering education or major purchase scenario objectives

To enter scenario objectives for the education goal, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the applicable goal link.
2. **Education goal only:** If applicable, use the slider bars or enter the percentage of the education expenses to cover.
3. **Education goal only:** To override the duration of the education goal, select the **Duration** option, and then enter the number of years you expect the education goal to last.
4. **Major purchase goal only:** To override the amount of the major purchase, use the **Purchase Amount** slider bar or select the option, and then enter a rate at which to adjust annual savings.

- To override the inflation rate for this scenario, select the **Infl** option, and then, if applicable, enter a new rate.
- Major purchase goal only:** To override the purchase date, select the **Purchase Date** option, and then enter a new date.
- To override the default investment profile for the goal, on the **Objectives** tab, select the **Investment Objective** option next to the profile, and then select a different profile. The **Return Rates** fields update automatically.
The default investment profile for the plan is defined on the **Plan Management** section – **Asset Allocation** category – **Profile** page.
- To override the return rates for the scenario, select the applicable **Override** option, and then enter new return rates.

Entering additional savings for the education or major purchase goal scenario

To enter additional savings for the education or major purchase goal scenario, follow these steps:

- In **Scenario Manager** under **Analyze Goals**, click the applicable goal link.
- Use the slider bars for **Additional Monthly Savings** and **Additional Lump Sum Savings** to arrive at an optimal savings amount, or enter the amount. NaviPlan assumes that the savings are directed to a non-registered account, which is created when the savings are entered. The return rate is based on the suggested asset mix.
- To specify additional savings strategy details such as inflation rates, and start and end dates, click  and then enter the additional details in the dialog box that opens.

Editing existing or adding new savings strategies (Level 2)

To edit existing savings strategies or to add new savings strategies for the education or major purchase goal into the scenario, follow these steps:

- In **Scenario Manager** under **Modify Financial Data**, click the **Strategies** link.

Consider using a maximizer savings strategy to reduce any excess RRSP contributions and eliminate any unused deduction room. Refer to [Help](#).

Scenario Manager dialog box – Strategies link – Savings tab

2. To edit an existing savings strategy, under **Non-Registered** or **Registered** on the **Savings** tab, select the **Override** option, and then edit the savings strategy details.
3. To add a new savings strategy, under **Non-Registered** or **Registered**, select an account from the **Choose Account** menu, and then click **Add Savings Strategy**. Enter the savings strategy details.
4. Under **Analyze Goals**, click the <education> or <major purchase> goal link to return to **Retirement** details. Under **Goal Coverage**, note that the goal coverage for the education or major purchase goal updates.

Entering education transfer strategies (Level 2)

Note: Transfers cannot be entered in the **Current Plan** scenario.

To model transferring assets from one account to another, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the applicable goal link, and then go to the **Transfers** tab. Under **Transfers**, existing transfers appear.

The screenshot shows the 'Transfers' tab in the Scenario Manager dialog box. At the top, there are tabs for 'Objectives' and 'Transfers'. Below the tabs, the title 'Transfers' is displayed. To the right of the title is a search bar and a blue button labeled 'ADD TRANSFER STRATEGY'. Below this is a table with the following columns: Source Account, Destination Account, Account Details, Transfer Amount (\$ or %), Transfer Date, Pre-Tax Contrib., Pay Taxes From, and Actions. The first row of the table shows 'Savings' in the Source Account column, an empty dropdown in the Destination Account column, an empty field in the Account Details column, '\$0' in the Transfer Amount column, 'Feb 1 2014' in the Transfer Date column, an empty checkbox in the Pre-Tax Contrib. column, 'Cash Flow' in the Pay Taxes From column, and an 'X' icon in the Actions column.

Scenario Manager dialog box – Education link – Transfers tab

2. Under **Transfers**, select the source account you want to transfer funds from, and then click **Add Transfer Strategy**.
3. From the **Destination Account** menu, select the account you want to transfer funds to, and then enter the dollar amount or percentage of the source account you want to transfer.
4. Enter the date when you want the transfer to occur.

Adding new education or major purchase accounts to the scenario (Level 2)

To add new accounts to the scenario, follow these steps:

1. In **Scenario Manager** under **Modify Financial Data**, click the **Net Worth** link, and then go to the **Accounts** tab.
2. Click **Add Account**.

Customizing what-if scenarios: Emergency Fund

NaviPlan allows you to customize existing emergency fund scenarios to help meet the needs of your clients' financial situation and their preferences. Once you have an appropriate scenario for your clients' plan, you can recommend it. Recommended scenarios apply to reports where the **Recommended** plan type is used. For information on recommending scenarios, see **Recommending a scenario** on page 18.

All what-if scenarios are created and customized in **Scenario Manager**. To access it, go to the **Results** section – **Analyze Goals** category – **Scenarios** page, and then click the **Edit <scenario> Plan**.

Entering emergency fund scenario objectives

To enter scenario objectives for the emergency fund goal, follow these steps:

1. In the **Scenario Manager** dialog box under **Analyze Goals**, click the **Emergency Fund** link.

Customizing what-if scenarios: Insurance (Level 1)

NaviPlan allows you to customize a recommended scenario to meet the needs of your clients' financial situation and preferences. Recommended scenarios apply to reports where the Recommended plan type is used.

To customize the survivor, disability, or long-term care scenario, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the appropriate insurance goal link. In this example we will look at survivor income.

Scenario Manager dialog box – Survivor Income link (Level 1 Plan) – Objectives tab

2. Use the slider bar for **Death Benefit** (survivor income), **Disability Benefit** (disability income), or **Daily Benefit Amount** (long-term care) to arrive at an optimal insurance amount, or enter the amount.
3. Enter the premium amount.
4. Survivor income scenario only: To override the rate of return used for life insurance proceeds, under **ROR on Cash Flow Surpluses & Liquidations**, select the option, and then enter a new return rate.
5. Long-term care insurance scenario only: Select the **Additional Daily LTC Expenses** option, and then enter the daily expense amount that is to be covered.
6. Under **Goal Coverage**, note how your changes affect the **Goal Coverage** graph.

Customizing what-if scenarios: Survivor Income (Level 2)

The analysis method chosen in the **Set Goals** section – **Survivor Income** category determines the available tabs under **Survivor Income** in **Scenario Manager**:

- **Quick Assessment** method – Calculates the clients' need for additional insurance on the basis of a simple comparison of their needs to their available assets.
- **Goal and Expense Analysis** method – Uses the clients' existing lifestyle expenses and goal information to define their insurance needs.
- **Income Coverage Analysis** method – Uses the clients' income to estimate the anticipated expenses during the survivorship period.

NaviPlan allows you to customize a recommended survivor income scenario for your clients' financial situation and preferences. Recommended scenarios apply to reports where the **Recommended** plan type is used.

To customize a survivor income scenario, complete the following procedures, based on the method used (or special circumstance):

Note: The procedures available depend on which analysis method is selected on the **Set Goals** section – **Survivor Income** category – **Survivor Income** page.

Goal and Expense Analysis method:

- **Entering survivor income assumptions (Level 2)** on the next page
- **Entering ongoing expenses (Level 2)** on page 46
- **Entering the survivor's annual income needs (Level 2)** on page 48
- **Entering the survivor's lump-sum needs at death (Level 2)** on page 48

Income Coverage Analysis method:

- **Entering survivor income assumptions (Level 2)** on the next page
- **Entering additional annual income at death (Level 2)** on page 47
- **Entering the survivor's lump-sum needs at death (Level 2)** on page 48
- **Entering the survivor's income at death (Level 2)** on page 49

Quick Assessment Method:

- **Customizing what-if scenarios: Life Insurance Quick Assessment** on page 52

When both the client and co-client die together:

- **Entering dependant needs when both clients die (Level 2)** on page 50

Entering survivor income assumptions (Level 2)

To enter survivor income assumptions in the **Recommended Plan** scenario, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the appropriate <insurance goal> link.

Scenario Manager dialog box – Survivor Income link (Level 2 Plan) – Assumptions tab

2. Under **Survivor Income - <client>** details, to include additional life insurance, enter the death benefit and annual premium amount. You can use the slider bar and the **What Are My Options?** button to find the optimal life insurance amount.
3. To override the return rates used for the additional life insurance, select the override option, and then enter the pre-retirement and retirement return rates.
4. To change the survivor's retirement age for the scenario, select the **Survivor Retirement Age** option, and then enter the retirement age or date.
5. To change the survivor's life expectancy for the scenario, select the **Survivor Life Expectancy** option, and then enter the life expectancy age or year.
6. To override the return rates used for cash flow surpluses and liquidations, under **ROR on Cash Flow Surpluses & Liquidations**, select the override option, and then enter the pre-retirement and retirement return rates.
7. Note the goal coverage graph results.

Entering ongoing expenses (Level 2)

This procedure only applies if the **Goal and Expense Analysis** method is selected on the **Set Goals** section – **Survivor Income** category – **Client/Co-client Objectives** page.

To enter the survivor's annual expenses at death in the **Recommended Plan** scenario, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the appropriate **Survivor Income** link, and then go to the **Ongoing Expenses** tab.

Scenario Manager dialog box – Survivor Income link (Level 2 Plan) – Ongoing Expenses tab

2. To change the default percentage of expenses to cover at death, under **Annual Expenses**, select the **Percentage of lifestyle expenses to cover** option, and then enter a new percentage.
3. To change the percentage of education expenses to cover at death, click **Education Expenses**.

Education Expenses

Select the checkbox beside the education goal to override the percentage of the education expense that is expected to continue after the death of the client or co-client.

Education Goals						
Override	Description	Name	Start Age	Number of Years	Annual Amount	% to Cover
☐	University Education	Jeremy	18	4		100%

OK
CANCEL

Scenario Manager dialog box – Survivor Income link (Level 2 Plan) – Education Expenses button – Education Expenses dialog box

- For each applicable education goal, select the option next to the goal, and then enter a new percentage in the **% to Cover** field.
- Click **OK**.
- To add additional expenses to the scenario, under **Additional Expenses**, click **Add Additional Annual Expense**.
- Enter a description and the annual amount of the expense.

Entering additional annual income at death (Level 2)

This procedure only applies if the **Goal and Expense Analysis** method is selected on the **Set Goals – Survivor Income – Client/Co-client Objectives** page.

To enter the survivor's additional annual income at death in the **Recommended Plan** scenario, follow these steps:

- In the **Scenario Manager** under **Analyze Goals**, click the appropriate **Survivor Income** link, and then go to the **Additional Annual Income** tab.

Assumptions
Ongoing Expenses

OR
To create a new income, under **Additional Annual Income**, click **Add Additional Annual Income**.
- Enter the income description, select the income type, and then enter an annual income amount.

Entering the survivor's annual income needs (Level 2)

This procedure only applies if the **Income Coverage Analysis** method is selected on the **Set Goals – Survivor Income – Client/Co-client Objectives** page.

To enter the survivor's annual income needs at death in the **Recommended Plan** scenario, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the appropriate **Survivor Income** link, and then go to the **Annual Income Needs** tab.

The screenshot shows the 'Annual Income Needs' tab within the Scenario Manager dialog box. At the top, there are four tabs: 'Assumptions', 'Lump Sum Needs', 'Annual Income Needs' (which is selected), and 'Survivor's Income'. Below the tabs, there is a table with the following columns: 'Description', 'Member', 'Income Need (pre-tax)', 'Frequency', 'Start Date', 'End Date', 'Infl +/- Add'l', and 'Actions'. A single row is visible with the following data: 'Additional Annual Inc', 'Sarah', '\$0', 'Annual', 'Jan 1 2014', 'Death (Owner)', '+', and '0.00%'. To the right of the table is a blue button labeled 'ADD ANNUAL INCOME NEED'. Below the table is a blue button labeled 'EDUCATION EXPENSES...'. There is also a blue button with a question mark icon in the top right corner of the tab area.

Scenario Manager dialog box – Survivor Income link (Level 2 Plan) – Survivor Income details – Annual Income Needs tab

2. Under **Additional Annual Income Needs**, click **Add Additional Annual Income Need**.
3. Enter the income description and pre-tax amount needed.
4. To change the percentage of education expenses to cover at death, click **Education Expenses**.

The screenshot shows the 'Education Expenses' dialog box. At the top, there is a title bar with a question mark icon and a close button. Below the title bar, there is a text box that says: 'Select the checkbox beside the education goal to override the percentage of the education expense that is expected to continue after the death of the client or co-client.' Below this text box is a table with the following columns: 'Override', 'Description', 'Name', 'Start Age', 'Number of Years', 'Annual Amount', and '% to Cover'. A single row is visible with the following data: a checked checkbox, 'University Education', 'Jeremy', '18', '4', and '100%'. At the bottom right of the dialog box are two buttons: 'OK' and 'CANCEL'.

Scenario Manager dialog box – Survivor Income link – Education Expenses button – Education Expenses dialog box

5. For each applicable education goal, select the option next to the goal, and then enter a new percentage in the **% to Cover** field. When you are done, click **OK**.

Entering the survivor's lump-sum needs at death (Level 2)

To enter the survivor's lump-sum needs at death in the **Recommended Plan** scenario, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the appropriate **Survivor Income** link, and then go to the **Lump Sum Needs** tab.

- To override an existing ongoing expense, under **Support for Dependents**, select the option next to an existing expense, and then edit the information, or click **Details**.
- To add a new ongoing expense, click **Add Support for Dependent**.
- Enter the details of the dependent expense(s).
- For each applicable education goal, select the option next to the goal, and then enter a new percentage in the **% to Cover** field.
- Go to the **Lump Sum Needs** tab.
- Select the option next to an existing expense that you expect will apply.
- If any other lump-sum needs are expected, click **Add Lump Sum Need**, and then enter the details of the need in the fields that appear.

Customizing what-if scenarios: Life Insurance Quick Assessment

The **Quick Assessment** method calculates your clients' additional insurance needs based on a simple comparison of their lump sum and ongoing needs to their assets available to offset those needs. This allows you to quickly assess your clients' need and provide an accurate amount of additional coverage they will require.

To make changes to Survivor Income goals calculated using the **Quick Assessment** method, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the **Survivor Income** link for the appropriate client(s).

Customizing what-if scenarios: Disability Income (Level 2)

The analysis method chosen in the **Set Goals – Disability Income** category determines the available tabs in the **Analyze Goals** section of **Scenario Manager**:

- **Goal and Expense Analysis** method – Uses the clients' existing lifestyle expenses and goal information to define their insurance needs.
- **Income Coverage Analysis** method — Uses the clients' income to estimate the anticipated expenses during the disability period.

NaviPlan allows you to customize a recommended disability income scenario for your clients' financial situation and preferences. Recommended scenarios apply to reports where the **Recommended** plan type is used.

To customize the disability income scenarios, complete the following procedures, based on the method used:

Note: The procedures vary depending on which analysis method is selected on the **Set Goals** section – **Disability Income** category – **Client/Co-client Objectives** page.

Goal and Expense Analysis method

- Entering disability income assumptions (Level 2) below
- Entering ongoing expenses during disability (Level 2) on page 57
- Entering lump-sum needs during disability (Level 2) on page 59

Income Coverage Analysis method

Scenario Manager dialog box –Disability Income link –Income Available tab

2. To override an existing income, select the option next to the income.
3. To add a new income for the scenario, click **Add Disability Income**, and then enter the income details.
4. To enter additional details for the income, click .
5. Enter detailed information.
6. Repeat steps 2–5 until you are finished entering details for the income.

Customizing what-if scenarios: Long-Term Care (Level 2)

NaviPlan allows you to customize a recommended long-term care scenario for your clients' financial situation and preferences. Recommended scenarios apply to reports where the ***Recommended*** plan type is used.

To customize the long-term care, see the following sections:

- **Entering long-term care assumptions (Level 2)** on the next page
- **Entering long-term care incomes and expenses** on page 64

Entering long-term care assumptions (Level 2)

To enter long-term care assumptions in a what-if scenario, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the **Long-term Care – Client/Co-Client** link, and then go to the **Assumptions** tab.

Long-term Care - Client

Goal Coverage

100%

WHAT ARE MY OPTIONS?

[Compare Scenarios...](#)

Assumptions **LTC Incomes & Expenses**

Adjust Milestones

☐ David will enter LTC at age in the year

☐ LTC period years [1](#)

[1](#) Assumption is that David dies at the end of the LTC period.

ROR on Surpluses & Liquidations

Total

☐

Applies to proceeds from liquidated assets.

Scenario Manager dialog box – Long-term Care link – Assumptions tab

2. To override the age at which the client or co-client will enter long-term care, select the option next to the **Age at Start of LTC** field, and then enter new values.
3. To override the duration of the long-term care period, select the option next to **LTC period years**, then enter the number of years. NaviPlan assumes that the client will die at the end of the period.
4. To override the **ROR on Surpluses & Liquidations**, select the option and enter a new return rate.
5. To include additional long-term care insurance in the scenario, under **Long-term Care - Client/CoClient** details, enter the **Daily Benefit Amount** and **Premium**.

Entering long-term care incomes and expenses

To enter long-term care incomes and expenses for the **Recommended Plan** scenario, follow these steps:

1. In **Scenario Manager** under **Analyze Goals**, click the **Long-term Care – Client/Co-Client** link, and then go to the **LTC Incomes & Expenses** tab.

Assumptions | **LTC Incomes & Expenses**

Existing Annual Expenses

Percentage of lifestyle and medical expenses to cover during ☒ **Long-term Care** 100% ☐ **Survivorship** 85%

Existing Incomes

☒ Percentage of income David expects to receive during LTC **Blended**

Additional Long-term Care Expenses [ADD ADDITIONAL LTC EXPENSE](#)

☐	LTC Expense		\$0	Daily	LTC	4	Death (...)	+ 0.00%	✕

Scenario Manager dialog box – Long-term Care link – LTC Incomes & Expenses tab

2. To override the percentage of lifestyle and medical expenses to cover during the long-term care and survivorship periods, under **Existing Annual Expenses**, select the **Percentage of lifestyle and medical expenses to cover** option, and then revise the percentages. NaviPlan assumes that the client will die at the end of the long-term care period.
3. To override the percentage of income the client or co-client will receive during the long-term care period, under **Existing Incomes**, select the **Percentage of income <client/co-client> expects to receive during LTC** option, and then enter a new percentage.

Note: If the percentage of expenses to cover or expected income varies among expenses and income, **Blended** appears in the field.

4. To edit an existing additional long-term care expense in the **Recommended Plan** scenario, under **Additional Long-term Care Expenses**, select the option next to the expense.

OR

To add a new long-term care expense for the scenario, click **Add Additional LTC Expense**, and then enter the expense details.

Chapter 6: Examining results

After you have entered your clients' financial information and goals into a plan, you can prepare and generate results. When you are satisfied with the results, you can generate professionally designed client reports that you can distribute to your clients.

In this chapter:

Viewing goal coverage progress	66
Tracking net worth and cash flow projections/Viewing goal coverage progress	66
Using the Planning Assistant	67
Opening the Planning Assistant	67
Viewing and/or printing the Planning Assistant reports	68
Using reporting options in NaviPlan	70
Generating stand-alone reports and graphs	71
Using Next-Gen Reports	74
Working in Next-Gen Reporting	74
Creating a new report with Next-Gen Reporting	75
Creating a new template with Next-Gen Reporting	76
Using a template to create a report	76
Adding custom content to a report	77
Converting Next-Gen reports to Microsoft Word output	77
Generating client reports	78
Preparing custom text for reports	81
Managing quick picks for user-defined text	82
Adding user-defined text to Next-Gen reports	82
Using the Client Report Monitor (Online)	83
Adding notes for your own personal use	84

Viewing goal coverage progress

NaviPlan allows you to quickly view **Current Results** for clients' projected net worth, cash flow, and goal coverage progress based on the information you have entered in the analysis so far. It also recommends steps that clients could take to achieve 100% goal coverage.

Current Results are available for the following goal types:

- Retirement
- Survivor Income
- Education
- Major Purchase
- Disability Income

Note: The actual goals that appear your screen will depend on the modules you selected on the **Modules** screen during goal creation.

Tracking net worth and cash flow projections/Viewing goal coverage progress

To track projections of clients' net worth and cash flow or to view their goal coverage progress, follow these steps:

1. Go to the **Quick Actions** menu and select **Current Results**.
2. Select either the **Net Worth** or **Cash Flow** tab to view projections of the clients' financial situation.
3. Select a tab for one of the goals for which you would like to view the coverage.
 - The goal coverage graphs are interactive - hover over a bar to view the details for that particular year.
 - You can click on labels in the graph key to hide or display the associated category from the graph.
4. View suggested methods to achieve 100% goal coverage under **Options to Increase Goal Coverage**.
5. Once you've reviewed your clients' progress and the suggested options to increase coverage, click **Close** to return to where you left off.

Current Results dialog box – Education tab

Using the Planning Assistant

The **Planning Assistant™** displays a broad overview of the potential success of the plan. It summarizes potential problems, opportunities, and questions. You can use the **Planning Assistant** reports to analyze the financial data in your clients' current or recommended plan.

These reports identify the strengths and weaknesses of the plan. In some cases, the reports identify something discretionary that does not apply to the current plan and can be ignored. In other cases, the reports identify an improvement that could be made with a simple data change. Sometimes, following the recommendations requires using one or more financial planning strategies.

You can open the **Planning Assistant** from the **Quick Actions** menu while working in any plan.

Opening the Planning Assistant

To open the **Planning Assistant**, follow these steps:

1. Click the **Quick Actions** button near the upper-right corner of the NaviPlan window and select **Planning Assistant** from the menu.

Planning Assistant dialog box

2. From the **Settings** menu, select the plan type you want to analyze. The **Current** option is based on the plan in which you are working. The **Recommended** option represents the **Recommended Plan** scenario, which takes into account additional assumptions and strategies including those selected in the **What Are My Options?** dialog boxes found throughout NaviPlan.
3. Click a tab to view detailed information.

Viewing and/or printing the Planning Assistant reports

The **Reports** tab and the **Overview** tab provide a synopsis of the other **Planning Assistant** reports.

To view or print the **Planning Assistant** reports, follow these steps:

1. Open the **Planning Assistant**, select either **Current** or **Recommended**, and then go to the **Reports** tab.

The screenshot shows the 'Planning Assistant' dialog box with the 'Reports' tab selected. At the top, there is a 'Settings:' dropdown menu currently set to 'Current'. To the right of the settings are two buttons: 'PDF' and 'WORD'. Below the settings is a row of tabs: 'Overview', 'Problems', 'Questions', 'Opportunities', and 'Reports'. The 'Reports' tab is active. Inside the 'Reports' tab, there is a 'Select a report' dropdown menu with 'Introduction' selected. Below this, there is a paragraph of text: 'To review the reports listed, select an option from the list above.' This is followed by three paragraphs of text, each describing a different report: 'The **TFSA** report contains information specific to TFSAs. Here you will find useful analysis and recommendations regarding TFSA contributions, unused contribution room, over contributions, etc.', 'The **RRSP** report contains information specific to RRSPs. Here you will find useful analysis and recommendations regarding RRSP contributions, unused contribution room, overcontributions, etc.', and 'The **Cash Flow** report contains information related to *Pre-Retirement* surpluses and deficits. This information is useful in determining the impact that the client's goals and associated savings plans will have on their cash flow. You should be aware that the system is not designed to perform detailed cash flow analysis. Please refer to the **Cash Flow** report for more details.' The final paragraph describes the 'The **Net Worth** report contains information on the accumulation and/or depletion of assets over time. It displays both assets and liabilities, and the net value or difference at the end of the current year.' The last paragraph describes 'The **Action Plan** report contains a summary of the Goals specified in the plan, the current savings allocated to each goal, and any additional savings that are required to achieve each goal (as determined by the system based on the assumptions in the plan).' At the bottom right of the dialog box is a 'CLOSE' button.

Overview Problems Questions Opportunities Reports

Select a report: Introduction

To review the reports listed, select an option from the list above.

The **TFSA** report contains information specific to TFSAs. Here you will find useful analysis and recommendations regarding TFSA contributions, unused contribution room, over contributions, etc.

The **RRSP** report contains information specific to RRSPs. Here you will find useful analysis and recommendations regarding RRSP contributions, unused contribution room, overcontributions, etc.

The **Cash Flow** report contains information related to *Pre-Retirement* surpluses and deficits. This information is useful in determining the impact that the client's goals and associated savings plans will have on their cash flow. You should be aware that the system is not designed to perform detailed cash flow analysis. Please refer to the **Cash Flow** report for more details.

The **Net Worth** report contains information on the accumulation and/or depletion of assets over time. It displays both assets and liabilities, and the net value or difference at the end of the current year.

The **Action Plan** report contains a summary of the Goals specified in the plan, the current savings allocated to each goal, and any additional savings that are required to achieve each goal (as determined by the system based on the assumptions in the plan).

CLOSE

Planning Assistant dialog box – Reports tab

2. Select one of the following reports:

- **Introduction** – A summary of each of the reports available to you in the **Planning Assistant**.
- **TFSA Contribution Limits** – Details about TFSA contributions, unused contribution room, overcontributions, and pension adjustments.
- **RRSP Contribution Limits** – Details about RRSP contributions, unused contribution room, overcontributions, etc.
- **Cash Flow** – Summary of pre-retirement cash flow surpluses and deficits. This information is useful for seeing how the clients' cash flow is affected by their goals and associated savings strategies.
Note: The **Planning Assistant** is not designed to perform a detailed cash flow analysis. For a more detailed report, you can access the **Cash Flow Details** report from the **Reports** menu.
- **Net Worth** – Summary of all the assets and liabilities entered into the plan for the clients (client, co-client, and joint ownership) and the net value and accumulated surplus/deficit at the end of the plan year.
- **Action Plan** – Summary of the goals specified in the plan, the current savings allocated to each goal, and any additional savings that are required to achieve each goal.

3. To print the **Planning Assistant** report displayed on the current tab, click **PDF** or **Word**. The report generates in its own window and can be printed from your desktop.

Using reporting options in NaviPlan

NaviPlan offers three primary report types:

- **Standalone Reports** allow you to verify the numbers after you have entered your clients' financial information and goals. These are intended for your use or to review information prior to meeting with your clients. They feature a straight-forward layout and focus on numbers.
- **Next-Gen Reports** summarize a client's plan using a modern, professional design. Their easy-to-understand content and format is intended to be shared with clients. Next-Gen reports are available for each category in the left navigation bar.
- **Client Reports** are traditional, figure-focused reports that summarize a client's plan. Client reports have a simple layout and focus on numbers without the contextual explanations of Next-Gen reports.

Generating stand-alone reports and graphs

After you have entered your clients' financial information and goals, you can verify the results by generating stand-alone reports and graphs. NaviPlan provides a large selection of reports and graphs from the **Quick Actions – Reports** menu. Level 2 Plans have access to a larger number of reports than Level 1 Plans.

To generate a stand-alone report or graph, follow these steps:

1. Go to the **Quick Actions** menu – **Reports** menu, select a report category (and if applicable, a subcategory), and then select the report or graph you want to generate.

Reports menu (Level 2 Plan, Detailed Tax method)

Depending on the report or graph type selected, the **Assign Settings** dialog box may open. The contents of this dialog box varies depending on the report selected.

2. If applicable, enter the settings details, and then click **OK**.
3. If a **Report Year** field appears in the **Assign Settings** dialog box (e.g., for the **Cash Flow Details** report) and you want to report on a different year, after you have generated the report in the report window, click **Previous Year** or **Next Year**. NaviPlan redisplay the report based on the applicable year.
4. To redisplay the report settings, click **Report Settings** at the bottom of the report window. To hide the settings again, click **Report Settings**.
5. To generate a report or graph that you can print or distribute, beside the **PDF** or **Word** button, click the  button, and then select **Automatic**, **Portrait**, or **Landscape**. The report or graph generates as a PDF or Word file.
Note: Selecting **Automatic** generates a report or graph using NaviPlan's default printer orientation.
6. If you made changes to the plan and the report window is still open, click **Refresh** to update the report.
7. To duplicate the report or graph, click **Duplicate**. NaviPlan creates a duplicate and displays it next to the original in the same window.
8. To generate a report or graph from within an open stand-alone report or graph window, click **Report**.

Report categories	Examples of the tasks you can perform
<i>Favourite Reports</i>	Keep reports that you use frequently readily available.
<i>Summary</i>	View an action plan for the clients' investments, redemptions, insurance, and debt. View a synopsis of the data entered into the plan. View the results of the Planning Assistant™ report. Compare differences between the current plan and the recommended plan.
<i>Net Worth</i>	View account and holding details. Compare summary or detailed changes in net worth over time. View composition and activity details for the clients' assets and liabilities.
<i>Cash Flow</i>	Monitor changes in cash flow activity. Examine current and projected cash flow on a single or multi-year basis. View the effects of taxes and capital loss carryovers. Monitor changes in projected surpluses and deficits.
<i>Income Tax</i>	Monitor income tax changes and capital loss carryovers. If you are using the Detailed Tax method, additional income tax reports are available.
<i>Goals</i>	View details of goals and goal savings. Compare goal needs with current and projected goal funding. View summaries for each goal.
<i>Asset Allocation</i>	Compare current and suggested asset mixes, asset class weightings, and the efficient frontier. If you are using predefined asset allocation, examine risk score and questionnaire results.
<i>Insurance</i>	Analyze the effects of death, disability, critical illness, long-term care, and insurance on cash flow. Analyze the effects of asset redemptions at death, during disability, if critically ill, and for long-term care.
<i>Estate</i>	View the value of the clients' estates in a given year. Monitor changes to the value of the clients' estates and how taxes, expenses, and benefits may affect it.
<i>Fact Finder</i>	View an input summary and prepopulated Fact Finder.
<i>Needs vs. Abilities</i>	Compare goal type needs with abilities to meet those goals (all goals of the same type are grouped together in the same graph).

Report categories	Examples of the tasks you can perform
<i>Capital Accumulation and Redemption</i>	Analyze the accumulation and redemption of capital used to fund a goal type or all goals.
<i>Deficit Coverage</i>	Compare deficit coverage assets to deficit coverage sells (Detailed Tax method only).
<i>Monte Carlo</i>	Analyze the probability of plan success given random asset returns based on the standard deviation assigned to each account and holding.

Using Next-Gen Reports

Next-Gen Reports feature a number of improvements to the traditional client reporting structure including:

- a new modern design.
- increased control over the pages included in your report.
- improved user interface controls allowing you to preview pages, get summary information, and easily modify the order in which pages appear.

In order to understand Next-Gen Reporting, it is important to understand a few terms:

Term	Definition
Report page	A report page is a single topic. Each tile on the Build Report page adds report pages to your report.
Report	A report is a collection of report pages. After you have added each of the report pages you wish to present to your clients on the Build Report page, the generated output is called a report.
Template	A template is a report that has been saved for multiple uses. By saving reports as a template you can present the same set of report pages to all of your clients saving you time and ensuring consistency.

Working in Next-Gen Reporting

Next-Gen Reporting can be accessed from the **Results – Next-Gen Reports** section. When you first access Next-Gen Reports you will be taken to the **Select Report** page.

Results category – Next-Gen Reports section – Select Reports page

Creating a new report with Next-Gen Reporting

Follow these steps to create a new report:

1. From the **Select Report** page, select **Start a New Report**.
2. Use the **Select a category** menu to display a list of report pages for each category.
3. Report pages are displayed as tiles. Select **Add** for each tile you want to include in your report. To remove a tile, select **Remove**.
 - Report tiles are categorized by the following sections:
 - **Content**: Dataless pages that provide an overview of the financial topic at hand. These provide context to reports and relate plans in a way that clients can understand.
 - **Summary**: Pages that cover clients' progress toward achieving their goal based on their current situation. These contain easy follow graphs and images.
 - **Current Plan**: Pages that summarize data for the current plan. These pages are numbers-oriented and often contain projection tables.
 - **Proposed Plan**: Pages that summarize data for the proposed plan. These pages are numbers-oriented and often contain projection tables.
 - Report pages display data for their section. For example, The **Cash Flow Surplus/Deficit** report page will display different data for the Current Plan than when selected for the Proposed Plan.

Tip: You can include up to two Alternative Plans in a report.

4. Review the order of report pages in the **Selected Pages** panel. The order displayed here matches the order in which reports will appear when generated.
 - To edit the position of report pages, drag and drop the page titles into the order you would like.

Tip: You can quickly select all report pages on the **Selected Pages** panel by clicking the **Check All** link.

5. When you are satisfied with these options, select **Build Report**.

Tip: If you run out of space on the **Select Pages** panel, you can select **Expand**  to enlarge the panel.

Creating a new template with Next-Gen Reporting

Follow these steps to create a new template:

1. From the **Select Report** page, select **Start a New Template**.
2. Select  to enter a name and description for the template.
3. Use the **Select a category** menu to display a list of report pages for a category.
4. Report pages are displayed as tiles. Select **Add** for each tile you want to include in your template. To remove a tile, select **Remove**.
 - Report tiles are categorized by the following sections: **Summary**, **Current Plan**, **Proposed Plan**, and **Alternative Plan**.
 - Report pages display data for their section. For example, The **Cash Flow Surplus/Deficit** report page will display different data when selected for the Current Plan section than when selected for the Proposed Plan.

Tip: You can view the report page tiles in summary view. To switch views, select  or  from the **View** section.

5. Review the order of report pages in the **Selected Pages** panel. The order displayed here matches the order in which reports will appear when generated.
 - To edit the position of report pages, drag and drop the page titles into the order you would like.
6. When you are satisfied with these options, select **Save**.
 - If you have not yet entered a name for your template, you will be prompted to do so now.

Using a template to create a report

Follow these steps to generate a report using an existing template:

1. From the **Select Report** page, find the template you want to use to create a report and select **Use**.
2. When you are satisfied with these options, select **Build Report**.

Adding custom content to a report

Follow these steps to add your own supplementary content (e.g. client's wills, other estate planning documents, etc.) in PDF format to a report:

1. From the **Build Report** page, select the **Custom Content** report tile.
2. Use the **Choose File** button to find your custom PDF.
3. Enter a **Title** for the custom content.
4. When you are satisfied with these options, click **OK**.

Note: The following requirements apply:

- Maximum of 1 PDF per report (10MB or less).
- PDFs generated in versions of Acrobat later than 5.0 may not be able to be uploaded.

Converting Next-Gen reports to Microsoft Word output

Follow these steps to convert any generated Next-Gen report into a Microsoft Word (.docx) export file:

1. Select the pages to include in your report, then click **Build Report**.
2. Once the report is generated a blue bar appears near the top of the page. From this bar, click **Convert to Microsoft Word** to generate the report in Word format.

Generating client reports

The following client reports are available in NaviPlan for Level 1 and Level 2 Plans and are accessible from the **Results – Client Report** page:

Client report	Description
Financial Needs Assessment	This report provides an overview of the clients' current financial situation and indicates whether the clients' goals are attainable.
Asset Allocation	This report demonstrates the effects that the clients' time horizon, risk tolerance, and asset allocation have on their portfolio returns. The clients' portfolio is calculated based on their existing accounts and related holdings.
Financial Needs Summary	This report provides an overview of your clients' current financial situation with special emphasis on their retirement goal. Typically, this report is used when the recommended plan has been finalized as the final presentation to the clients.
Retirement Distribution Summary	This report is useful to clients who are nearing or at retirement, and provides an in-depth review of the plan retirement period and the distribution of income the clients may expect in retirement. The report focuses on the apparent risks in the clients' current plan and how those risks have been reduced by strategies implemented in the proposed plan. It also shows a review of the fixed and total incomes as well as expenses during retirement.
Financial Needs Analysis	Level 2 This report provides a comprehensive view of the entire plan, including a summary of the clients' needs and objectives, the financial assumptions used in preparing the financial analysis, as well as additional strategies that could be implemented to achieve the objectives. The report includes summaries of the various analyses performed and recommendations and strategies that could be used to meet the clients' objectives. A synopsis of the analysis data is included.

To generate a client report, follow these steps:

1. Go to the **Results – Client Report** page.

Client Report << >>

Use this page to generate client reports.

Alternatively, to see the status of or print generated reports, go to the **Workflow** section - **Status** category - **Status** page.

Select Document Sections dialog box

5. Select the sections you want included in the report.
6. To view the subsections for a section, click the + beside that section. The menu expands and subsections appear. Select or clear the options for the appropriate subsections.
7. To reorder report sections, click an applicable section, and then drag it to another location.
8. To save your selections as a template for this type of client report, click **Save as Template**. Enter a name for the template, and then click **OK**.
The templates you create can be managed on the **User Preferences - System Settings** dialog box – **Templates** tab (**Settings** menu – **System Settings**).
9. Click **OK**. NaviPlan saves your selections.
10. To generate the report, click **Generate**. If you generated this report before, this button appears as **Regenerate**. If you are using NaviPlan Online, the **Status** column updates. To view the report or view the status of other reports, see **Using the Client Report Monitor (Online)** on page 83.
Note: In NaviPlan Offline, you may have to click **Refresh** to update the **Status** column.

Preparing custom text for reports

In NaviPlan, you can create and customize text that will be included in client and Next-Gen reports. Personalize your plans and presentations by entering text on goal progress, recommendations, and any specific action items you would like clients to pursue.

To enter personalized text for reports, follow these steps:

1. Go to the **Results – User Defined Text** page.
2. Under **User Defined Text Summary**, select the goal or category for the user-defined text.
3. Under **Objectives, Recommendations, or Action Plan**, click **Add**.

The dialog box is titled "User Defined Text Entry" and features a "My Quick Picks" dropdown menu at the top left. Below this is a rich text editor toolbar with icons for undo, redo, bold, italic, underline, link, unlink, bulleted list, numbered list, decrease indent, increase indent, and HTML source code. The main area of the dialog is a large text input field. At the bottom, there is a checkbox labeled "Save to my Quick Picks for future use". Navigation buttons include "ADD TEXT ENTRY" (with a dropdown arrow), "Previous Entry", and "Next Entry". The bottom right corner contains "OK" and "CANCEL" buttons.

User Defined Text Entry dialog box

4. Enter the text in the dialog box, and then use the formatting buttons where applicable.
Note: A spelling checker is not available. Use your browser's spell-check or copy and paste plain text from Microsoft Word. Graphics are not supported.
5. If you would like to use this text across multiple plans or with multiple clients, select the **Save to my Quick Picks for future use** option.
6. When you are finished, click **OK**.
7. To edit an existing entry, click  to reopen the **User Defined Text Entry** dialog box for that entry.
8. To reorder entries within a category, click **Move Up** or **Move Down**.
9. Repeat steps 2–8 until all your entries are complete.

Managing quick picks for user-defined text

To access and manage any existing quick picks, follow these steps:

1. On the **User-Defined Text** page, select a goal or category from the **User Defined Text Summary** menu.
2. Click **Manage My Quick Picks**.
3. A list of all quick picks saved for the goal or category will appear.
 - To add a new quick pick, click **Add**.
 - To edit the content of an existing quick pick, click .
 - To delete a quick pick, click .
4. Once you've finished managing your quick picks, click **OK**.

Adding user-defined text to Next-Gen reports

To add your user-defined text to Next-Gen reports, follow these steps:

1. Go to the **Results – Next-Gen Reports** page.
2. On the **Select Report** page, select either an existing template or click **Start a New Report**.
3. From the **Select a category** menu, select a goal or category.
4. Depending on the type(s) of user-defined text you entered (Objectives, Recommendations, or Action Plan), a report page will appear under the **Content** section.
5. Click **Add** to include the page(s) containing your user-defined text in the report.

Using the Client Report Monitor (Online)

The **Client Report Monitor** allows you to continue using NaviPlan when generating time-intensive client reports and progress reports. Each time you click the **Generate** button for a report, NaviPlan creates a request in the **Client Report Monitor** and generates the report.

Generating reports can take between a few seconds to a few minutes. The **Client Report Monitor** allows you to monitor your recent request and the requests for other reports. You can only open reports with a **Completed** status. The **Client Report Monitor** is available from all the following areas in NaviPlan Online:

- **Quick Actions** menu - **Reports**
- **Results – Client Report** page
- **Workflow – Status** page

To use the **Client Report Monitor**, follow these steps:

1. Generate a client or progress report, or from the **Reports** menu, select **Client Report Monitor**. The **Client Report Monitor** dialog box opens.
2. Do one of the following:

To...	Do this...
List all reports for which you have access	Clear the Show only reports for this plan option.
View a complete report	Click the link for a report with the Completed status. The report opens using the format specified on the User Preferences menu – User Preferences - System Settings dialog box – Report Format tab.
Delete a report	Click Delete for the applicable report, or click Delete All to delete all listed reports, and then click OK .

Note: If you close the **Client Report Monitor** while a report is generating the report will continue to process while you work in other areas of NaviPlan. If needed, you can generate additional reports while other reports are being processed. NaviPlan generates each report independently.

Adding notes for your own personal use

In NaviPlan, you can add notes for yourself that are not seen by the clients.

To enter personalized text for reports, follow these steps:

1. On any page within an open plan, go to **Quick Actions** menu - **Notes**, and then select **Add Note**.

The image shows a dialog box titled "Notes" with a question mark icon and a close button. Below the title bar, it says "Status > Status". There is a rich text editor toolbar with icons for undo, redo, copy, paste, bold, italic, underline, link, unlink, bulleted list, numbered list, decrease indent, increase indent, and HTML. The text area contains a timestamp "[Jul-24-13 10:57]". At the bottom, there are "OK" and "CANCEL" buttons.

Notes menu – Add Note – Notes dialog box

2. Enter the text into the dialog box, and then use the formatting buttons where applicable.
Note: A spelling checker is not available. Use your browser's spellcheck or copy and paste plain text from Microsoft Word. Graphics are not supported.

To view and print all notes that were entered for this plan, follow these steps:

1. On any page within an open plan, go to **Quick Actions** menu - **Notes**, and then select **View All Notes**.

The image shows a dialog box titled "Notes Summary" with a question mark icon and a close button. Below the title bar, it says "Status > Status - User-defined Note". There is a text area containing a timestamp "[Jul-24-13 10:58]" and the text "Client requests more information about...". To the right of the text area, there are "Actions" icons: a pencil and a close button. At the bottom, there are "PRINT", "OK", and "CANCEL" buttons.
